

# FORENSIC ENGINEERING

Disputes often arise when material performance problems or failures occur. Equitable resolution of such disputes hinges on acquiring reliable technical information from knowledgeable professionals. EDM has the technical expertise to provide objective and accurate analyses of product performance. Our forensic services include:

- Field inspection
- Laboratory testing
  - Material identification
  - Decay analysis
  - Moisture content and specific gravity determination
  - Materials testing for strength and stiffness properties
- Engineering analysis
- Codes and standards interpretation
- Expert witness services
- Recommendations for repair and maintenance
