

RESEARCH AND DEVELOPMENT

E | D | M

EDM is an industry leader in conducting materials engineering research and developing innovative solutions to engineering problems.

Product Development

- Design review and guidance
- Specification development
- Code acceptance
- Market assessment

Materials

- Wood products research
- Advanced structural analysis
- Material utilization studies
- Performance optimization

Test Services

- Material evaluation
- Material, component and full-scale structure testing
- Nondestructive evaluation

EDM has extensive testing capabilities and its technical staff is highly experienced in developing new products and evaluating and improving existing products.
